Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. With respect to Applicant's arguments filed on June 22, 2005, Examiner finds that there is more than one invention in this application. Examiner appreciates clarification of claims 5 and 16 that these claims are indeed different. With further examining of present application, Examiner finds that there are three different inventions in this application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 4, 21 – 24 and 41 - 44, drawn to maintaining data on a plurality of source code files for impact analysis by generating a data store, generating information on the program statement and use of data store, classified in class 707, subclass 103.
- II. Claims 5 – 15, 25 – 35 and 45 – 55, drawn to receiving selection of at least one program statement in one source code file, classified in class 709, subclass 221.
- III. Claims 16 – 20, 36 – 40 and 56 – 60, drawn to receiving selection of at least one program statement in the source code file, classified in class 717, subclass 121.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions as listed in Group I, Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as in Group I teaches maintaining data on a plurality of source code files for impact analysis by generating a data store, generating information on the program statement and use of data store, Group II teaches determining program statements throughout the source code files, while Group III teaches determining program statements in the source code file. The term "throughout the source code files" is substantially different from "in the source code file. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and Group III, the search required for Group II is not required for Groups I and Group III, and the search required for Group III is not required for Groups I and Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
